

Newton SEPAC Presents:

# DYSLEXIA TESTING DEMYSTIFIED

This webinar will help families understand neuropsychological testing for dyslexia and other learning disabilities. Presenters will explain what to look for in an evaluation and how to use results to support school-based planning with the special education team.

### GUEST SPEAKERS:

**Dr. Cara Soccorso**

Pediatric Psychologist &  
Clinic Director at Newton  
Neuropsychology Group

**Dr. Cara Socorro specializes in the assessment of children, adolescents, and young adults.** She has extensive experience in the early identification of autism and other neurodevelopmental differences, with a focus on translating evaluations into practical, strengths-based recommendations. Dr. Soccorso previously served as an attending psychologist at Boston Children's Hospital and Harvard Medical School and is committed to collaborating with families, schools, and medical providers to help children thrive.

**Cara Cohen**

Special Education  
Advocate

**Cara Cohen is an advocate supporting children with special needs and their families for 20 years.** Cohen holds a B.S. in Communicative Disorders from the University of Rhode Island and a master's degree in Special Education from Simmons College, with experience working with children with autism in clinical, home, and public school settings. Trained through the Federation for Children with Special Needs, Cara helps families understand their options, advocate for individualized supports, and reduce stress by securing services tailored to their child's needs.
